

Where you have any work done by an electrician who is a member of a competent person self-certification scheme, the electrician will be able to certify the work complies with the Regulations and you do not need to notify your Local Authority.

We recommend that you make yourself aware of the Regulations before you undertake any work and if you require any clarification you should contact your Local Authority Building Control Department.

Tools which may be required:

- ¥ Drill
- ¥ Cross Head Screwdriver
- ¥ Small Electrical Slotted Screwdriver
- ¥ Insulation Tape

Assembling the bulkhead light

Follow the guide on the last page to assemble the bulkhead light.

Double insulated items (Class 2): Are marked with the symbol
This fitting must not be Earthed.

Do not wire this lantern into the lighting circuit - use a switched fuse spur.
Do not attach any part of it to an Earth Wire or terminal.

Please note: For new installations, check for any electrical cables or pipe work (gas/water) in the vicinity of the intended mounting point for this product, before proceeding with the installation.

Selecting the correct lightbulb

Identify the correct maximum wattage and type of bulb by referring to the product labelling.

caution: only use a bulb of the same type designation and shape, and of the same or lower Wattage. Low Energy bulbs can be used where available

Allow the lamp to cool for at least 10 minutes before replacing spent bulbs.

Switch on!

You may now switch the electricity back on at the mains.

Cleaning care

Metal / Painted finishes should be cleaned with a soft, dry cloth only. Do not use polishes or abrasive cloths.

Glass shades should be given a light dusting only. Do not immerse in water or cleaning solutions.

Safety information

For your safety, please remember the following:

Always switch off the supply before removing shades/covers, changing lightbulbs or cleaning.

Helpline

If you receive this item with parts broken or missing, please telephone:

0845-230-3400
