 - 4 x screws 
 - 2 x mounting frame pieces with fixing holes 
 - 2 x mounting frame pieces without fixing holes 
 - 4 x corner connectors 

Installation

81850 surface mount kit is suitable for 595*595 panels.

92822 surface mount kit is suitable for 1195*595 panels.

92823 surface mount kit is suitable for 1195*295 panels.

Please refer to the installation instructions supplied with the fitting for wiring and connection details.

Note that the switch is turned off before installation.

The ceiling surface must be flat and smooth to ensure a good fit.

- Using four corner connectors connect to two mounting frames (without fixing holes) and push to secure. After completion such as mounting frame **A** (See Fig. 1).
- Slide two mounting frames **B** (with fixing holes) separately into a mounting frame **A** (with corner connectors) and push to secure (See Fig.1). Ensure the 2 opposite sides of the 3 sided frame have fixing holes. (See Fig.2)
- Using the part-assembled frame as a template, mark and drill the fixing holes on the ceiling. Take care not to damage any concealed wiring or pipes. Then fix the part-assembled frame to ceiling using the supplied plastic plugs and screws. (See Fig.3)
- Referring to Fig.4, connect the driver as per the instruction manual supplied with the panels and carefully slide the panel into the 3 sided frame.
- Slide the fourth frame **A** (with two corner connectors) into the part-assembled and push to secure (See Fig.5).
- Replace fuse or circuit breaker and switch on. Your light is now ready for use.
